<b>Chapter 6 Conclusion</b>	<b>12</b>

## Chapter 1 Introduction

In the rapidly evolving world of digital currency and blockchain technology, the importance of decentralized exchanges in the field of financial innovation is increasingly evident. The Cosmic Alliance, forged by tens of thousands of miners working together, with strong cohesion and forward-looking vision, is officially launching a comprehensive and forward-thinking ecological layout and medium- to long-term ecological plan. Currently, the Space-Swap exchange within the existing ecosystem has successfully entered the market and is officially operational. In the future, we have clear and ambitious medium- to long-term plans:

- In 2026, we will fully develop the Swap exchange and ecosystem wallet, carry out comprehensive technical updates and optimizations, and launch them in the market.
- From 2027 to 2029, the focus will be on building, upgrading, and optimizing centralized exchanges, followed by their launch into the market.
- In 2030 and beyond, we are committed to building a safe and efficient cosmic public chain and bringing it to the market. The ultimate plan of the Cosmic Alliance is to provide a series of digital platforms.

THIS WHITE PAPER WILL COMPREHENSIVELY ELABORATE ON THE BACKGROUND OF THE COSMIC ALLIANCE, ITS CORE ADVANTAGES, REVENUE DISTRIBUTION MECHANISM, AND FUTURE DEVELOPMENT PLANS, AIMING TO PROVIDE MARKET PARTICIPANTS WITH CLEAR AND TRANSPARENT INFORMATION, AND TO JOINTLY EMBARK ON A NEW CHAPTER IN DIGITAL FINANCE.

## Chapter 2 Project Background

### (1) Project Background of the Rise of the Digital Universe

With the continuous evolution of blockchain technology, the concept of the digital universe has emerged and gradually gained traction. It breaks through the constraints of traditional finance in terms of time and space, creating a free, open, and transparent trading environment for users worldwide. In this digital universe, where opportunities and challenges coexist, decentralized exchanges have become a key bridge connecting users and digital assets, playing an indispensable role.

### (2) The Birth of the Cosmic Alliance

The Cosmic Alliance was initiated and established by tens of thousands of like-minded miners, and it has also been favored and supported by overseas capital from Singapore. Both parties work hand in hand to build and develop the ecosystem. As important participants in the blockchain ecosystem, the miners have accumulated rich technical experience and extensive industry resources. They work together with the aim of creating a fair, just, and efficient digital platform, providing high-quality and efficient services to users worldwide.

### **(3) POFD: The only token of the universal public blockchain, driving ecosystem prosperity**

In the Universe public blockchain ecosystem, POFD is a unique public chain token and the core driving force of the ecosystem's operation.

Total issuance: 1 billion tokens, with 16 million currently in circulation.

The remaining tokens will be gradually released to the market, ensuring initial market activity while leaving enough room for ecosystem expansion and value growth.

A 3% transaction tax is applied to transactions, part of which is used to continuously burn POFD until the circulating supply drops to 21 million.

The burning mechanism increases the token's scarcity, laying a solid foundation for value growth and boosting holders' confidence.

Once the circulating supply reaches the target of 21 million, the transaction tax rate will automatically switch to a 0% tax mode, reducing transaction costs, enhancing market activity and liquidity, and attracting more participants to jointly build the ecosystem.

With a scientifically designed approach, POFD provides strong support for the development of the Universe public blockchain, leading the way into a new digital era.

### **(4) The Mission of Space~Swap Exchange**

Space~Swap Exchange bears the important mission of promoting digital financial innovation and advancing the development of the blockchain industry. We will be guided by user needs, continuously optimizing the trading experience, improving trading efficiency, and creating more value for users. At the same time, we actively engage in the construction of the industry ecosystem, promoting the widespread adoption and application of blockchain technology.

## Chapter 3 Core Advantages

### (1) Efficient Decentralized Trading

As a highly efficient decentralized swap across the network, Space~Swap Exchange utilizes advanced blockchain technology and smart contract algorithms to achieve automated, intelligent, and decentralized trading. Users can freely trade various digital assets on the platform without relying on centralized institutions, greatly improving trading efficiency and security.

### (2) Precisely meet user needs

We deeply understand users' needs and pain points, continuously optimizing platform features and services. Whether it's the design of the trading interface, the optimization of trading processes, or the variety of trading products, everything is centered on user experience, aiming to provide users with the most convenient and comfortable trading environment.

### (3) Unique Revenue Model

Space~Swap Exchange offers users a unique profit model. By returning a portion of the trading fees to users, it allows them not only to achieve asset growth during trading but also to earn additional returns. This innovative profit model has attracted the attention and participation of a large number of users, laying a solid foundation for the platform's development.

## Chapter 4 Revenue Distribution Mechanism

To show appreciation for users' support and trust in the Space~Swap exchange, the platform will generously return 0.3% of the transaction fees, with a diverse and reasonable profit distribution, as detailed below:

### (1) 50% of the 0.3% handling fee is returned to the market

#### 1. Share profits for free

**Direct Referral Sharing:** Users can earn 25% of the profits from the first generation when they directly share with new users who sign up and complete transactions. Direct sharing rewards are a direct incentive for users to actively expand the market and bring new traffic to the platform, encouraging them to share and promote so more people can learn about and participate in trading on Space~Swap Exchange.

**Indirect sharing:** In addition to earning direct sharing rewards, users can also earn 25% of the indirect sharing rewards. Indirect sharing rewards further expand the scope of user earnings. Even if a user is not directly sharing, as long as others enter the platform and make transactions through their subordinate users' referral links, the user can still receive corresponding rewards. This creates a broad promotion network, promoting the rapid spread and development of the platform.

Users can share the most efficient swaps with the lowest tax rates across the entire network, not only earning promotion rewards but also enjoying long-term trading profits. This dual-income model encourages users to actively participate in market promotion while providing a stable source of income.

**GIVE BACK  
TO THE  
MARKET**

**(2) The remaining 50% of the 0.3% handling fee will be publicly distributed**

### **1. Shareholder dividend 10%**

As important investors and strategic partners of the platform, shareholders provide financial and resource support for the platform's development. The platform allocates 10% of its profits for shareholder dividends, allowing shareholders to share in the platform's growth benefits and encouraging them to continue supporting the platform's long-term development.

### **2. Studio profit share 5%**

The studio plays an important role in the platform's technology development, marketing promotion, and operational management. To encourage the studio to continuously innovate and improve service quality, the platform allocates 5% of the revenue to the studio, which is used for team building, technology development, and market expansion, promoting the joint growth of the studio and the platform.

### 3. Server maintenance 5%

A stable server is the foundation for ensuring the normal operation of the platform. The platform allocates 5% of its revenue for server maintenance and upgrades to ensure it can handle high-concurrency transaction requests, provide a stable and smooth trading environment, and offer users a high-quality service experience.

### 4. Ecological Construction 30%

Ecological development is key to the platform's long-term growth. The platform invests 30% of its revenue into ecological construction, including supporting the launch of high-quality blockchain projects, organizing community activities, and hosting industry seminars. Through ecological development, the platform can attract more high-quality projects and users, diversify its trading offerings and ecosystem, and enhance its competitiveness and influence.

## Chapter 5 Future Development Plan

### (1) Technological Upgrades and Innovation

Continuously invest in research and development resources, constantly optimize the platform's blockchain technology and smart contract algorithms, and improve transaction processing speed and security.

At the same time, actively explore new technological applications, such as cross-chain technology and privacy protection technology, to provide users with more advanced and convenient trading services.

### (2) Market Expansion and User Growth

Increase market promotion efforts, expand the global market, and attract more users to join the Space~Swap exchange. Improve the platform's visibility and reputation by organizing online and offline events, collaborating with industry media, and building a strong brand image.

### **(3) Ecological Cooperation and Joint Development**

Strengthen cooperation with other high-quality projects and institutions within the industry to jointly promote the development of the blockchain industry. Through ecosystem collaboration, achieve resource sharing and complementary advantages, providing users with richer and more diversified digital asset trading services.

### **(4) Compliance Operations and Risk Management**

Actively respond to regulatory policies, strengthen compliant operations, and ensure that the platform's trading activities comply with legal and regulatory requirements. At the same time, establish a comprehensive risk management system, enhance monitoring and prevention of market risk, credit risk, operational risk, and other risks, to ensure the security of users' assets and the stability of transactions.

## Chapter 6 Conclusion

As a digital trading platform meticulously developed by the Cosmic Alliance, Space~Swap Exchange is set to play a significant role in the digital finance sector, thanks to its core advantages of highly efficient decentralized trading, precise fulfillment of user needs, and unique profit models.

In the future development path, all ecological revenues of the Cosmic Alliance will be linked to participants closely related to the community, and relevant participants will be able to receive corresponding dividends.

We sincerely invite users, investors, and partners from around the world to join us in embarking on this digital feast, sharing the future of wealth, and working together to promote the prosperous development of the blockchain industry!
